

Once upon a time, a public buyer was looking for the perfect supplier...
... but verification of eligibility of foreign candidates made the search challenging.

It would be great to have offers from other countries too...

BUT how to assess their eligibility?

*Criminal misconduct?
Financially & legally sound?
Technically capable to deliver?
.....*

I have a perfect offer...

BUT how to prove that I fulfil the tender criteria?

e-Certis

...solves a classical problem – comparability of various types of evidence issued in the EU

- free online guide of certificates needed for public procurement
- data is verified and updated by national ministries in charge
- appreciated both by buyers and bidders proving their eligibility

... no more searching for examples of certificates issued abroad

... confidence that other countries' info is verified by the responsible ministry

... EU funding is available to link national solutions to e-Certis

... finally a "broker" shedding light on documents requested by various tenderers

... user friendly tool simplifying life of businesses engaging in tenders "at home" and cross-border

... integrated into the ESPD service

don't forget to check out the ESPD – European Single Procurement Document at:
